Forecast For London & Southeast England
Issued by Met Office Exeter
at 1600 on Thursday 19 Aug 2021

++ Valid for broadcast between 1800 and 0600

Headline:
Showers easing. Damp overnight into Friday, but becoming brighter.

This Evening and Tonight:
Scattered heavy showers should fade as they move eastwards, leaving a drier but rather cloudy remainder of the night. The odd spot of light rain or drizzle remains possible, while developing cloud breaks may allow local fog patches to develop. Minimum temperature 11 deg C (52 deg F).

Friday:
Generally on the cloudy side overall, perhaps damp in places too at first, although developing cloud breaks should allow for some warm sunny spells for many later. Maximum temperature 23 deg C (73 deg F).

Outlook for Saturday to Monday:
Rather cloudy with some rain likely over the weekend, perhaps becoming heavy for a time. Gradually becoming drier, brighter and warmer through Monday.
